### Virtual Library™ 2.0 Launched at Endo Pharmaceuticals

WILTON, CT – October 14, 2008 – Infotrieve, Inc. ([www.infotrieve.com](http://www.infotrieve.com)), the global leader in business service solutions for information centers today announced the successful rollout of the new Virtual Library™ 2.0 platform at Endo Pharmaceuticals of Chadds Ford, PA.

[Virtual Library 2.0](#) is the second generation of the widely used web-based document sourcing and delivery platform in corporate information centers around the world. Enhancements to the product include high efficacy link-out technology, a new user friendly interface for ordering and tracking documents, and an extensive array of workflow management functions. In addition, the new product simplifies collection management and provides a detailed record of all transactions for accounting, audit, and subscription renewal purposes.

VL 2.0's order processing can integrate internal print and electronic collections with virtually all search and discovery platforms for easy browsing and ordering. This process ensures that only documents not available internally are secured on a pay-per-view basis.

"We are very excited at the successful launch of Virtual Library 2.0 at Endo," remarked Ken Benvenuto, President & CEO of Infotrieve, "their vision and commitment to the rollout of this innovative solution throughout all levels of the organization made them the ideal first client."

Virtual Library 2.0 document sourcing and delivery platform is suitable for automating and managing the document delivery process in companies of all sizes.

In addition to the technology solution, the Endo engagement includes Infotrieve's professional staffing and content procurement services.

#### About Infotrieve, Inc.

Infotrieve is the global leader in business service solutions for information centers in large and middle-market corporations with substantial resources dedicated to research and development. Infotrieve's expertise includes people, process, and technology solutions for all elements of information center management, content licensing, document delivery, copyright compliance, reprints and eprints, usage analysis, and collection management. During the past 20 years, Infotrieve has grown from a leader in document delivery services in the U.S. into a global full-service information management company.
